

REMARKS

By the above amendments, the original claims have been replaced with a new set of claims in which the multiple dependencies have been removed and the claims otherwise placed in better form for initial examination with no substantive change in the scope thereof being intended. Additionally, appended hereto is a substitute specification which merely amends the translated specification to add paragraph numbers, section headings, and to make minor editorial changes as well as to bring the abstract into conformance with U.S. requirements. No new matter has been added as can be seen from the appended mark-up copy of the substitute specification. Also attached is replacement sheet for Fig. 4 with the notation "Prior Art".

Respectfully submitted,

---
